ANDY LE

(905) 923 – 1997 | Andytule321@gmail.com | andy-tu-le | Andytule | andytule.github.io

TECHNICAL SKILLS

Frameworks: React · Next · Node.js · Express · Angular · Redux · RxJS · Jest · Tailwind · Vue · ASP.NET · .NET · Django · Knex
Languages: TypeScript · JavaScript · Python · SQL · Scala · C# · Java · HTML · CSS · SASS · Kotlin · Swift · C++ · PHP · C
Databases: PostgreSQL · MongoDB · MySQL · SQL Server · SQLite · Oracle
Technologies: Git · Docker · Kubernetes · Kafka · Databricks · GraphQL · Postman · AWS · Visual Studio · Android Studio

PROFESSIONAL EXPERIENCE

Dotmatics — **Oct 2024 – Present**
Software Engineer — *Boston, MA*

- Engineered full-stack features for **Luma's Registration** module, supporting single-compound and batch registration workflows enabling scientists to log, validate, and uniquely identify chemical and biological entities
- Built record submission and registration tracking systems using **React**, **TypeScript**, and **Node.js**, enabling end-to-end traceability across entity-batch-sample hierarchies
- Developed and consumed **RESTful APIs** backed by **PostgreSQL**, optimizing query performance across application services and achieving a **25%** reduction in query times
- Contributed to event-driven backend services using **Kafka** and data processing workflows with **Scala** and **Databricks**, supporting high-volume scientific data pipelines within Luma's DataCore infrastructure
- Ensured production reliability through comprehensive **Jest** test coverage and containerized deployments with **Docker** and **Kubernetes**

Dayforce — **Sept 2023 – Apr 2024**
Software Engineer Intern — *Toronto, ON*

- Developed features for the Benefits services, enabling employees to efficiently manage their benefits, generating **$1M** in revenue
- Refactored **React** frontend features using **TypeScript** and **Redux** for the Benefits Enrollment MFE, incorporating **Jest** for integration testing and improving scalability and session handling
- Revamped backend microservices using **C#** and **.NET** for efficient **SQL** querying and manipulation, achieving a **10%** increase in microservice throughput

Tesla — **Jan 2022 – Dec 2022**
Software Engineer Intern — *Fremont, CA*

- Developed a gamification system for Tesla service centers to automate vehicle repair/maintenance workflows and track technician progress, resulting in a **13%** increase in overall productivity
- Designed and deployed a full-stack dashboard using **React**, **TypeScript**, and **Node.js** for backend microservices, containerized with **Docker** for seamless scalability across environments
- Streamlined the Service Center Application, enabling technicians to manage inventory, appointments, and client data using **Angular** and **.NET** microservices backed by a **PostgreSQL** database

Caliber Communications (ECAM) — **Sept 2021 – Dec 2021**
Full Stack Developer Intern — *Hamilton, ON*

- Optimized the security report system by building a customizable dashboard UI, improving team productivity by **15%** and integrating real-time data streams via **WebSocket** using **Angular** and **RxJS**
- Engineered backend microservices with **Node.js**, **Express.js**, and **Knex** to aggregate security device data and implemented automated **PostgreSQL** scripts to purge **3.5TB** of obsolete data, ensuring database integrity

PROJECTS

Chord-Shift — Github | Live

- Architected a full-stack chord transposition tool using **React**, **TypeScript**, and **Node.js**, applying **Strategy**, **Factory**, and **Composite** design patterns to build a modular transformation engine with **Supabase** cloud storage and **Google Docs API** integration

EDUCATION

McMaster University — **2024**
Bachelor of Technology in Software Engineering Technology (Co-op), B.Tech. — *Hamilton, ON*

Mohawk College — **2019 - 2023**
Advanced Diploma in Computer Systems Technology - Software Development — *Hamilton, ON*
